Blossoms Preschool

If you are looking at the definition of a Preschool or a play school, then the dictionary suggests it to be an educational institution for children too young for elementary school. For parents, it is a common place where toddlers meet, play and spend time together under the supervision of a teacher or two.

Preschool may not be a place where formal education is imparted but yes, it definitely is a place where children have their first taste of independence. And today, with both the parents working, preschool is becoming an inevitable part of a child's life. When we talk about independence, it relates to a child remaining away from his parents for a couple of hours, thus breaking free off the separation anxiety.

At Blossoms, children are exposed to a lot of basic learning activities that help them to get independent faster. Our activities help develop in children many self-help qualities like *eating food themselves, dressing up, maintaining cleanliness and other such basic qualities* which imbibes good manners and social behavior in kids.

Besides this, learning activities at Blossoms help the children learn basic etiquettes like *exchanging greetings, sharing of food and toys, identifying their possessions, etc.* One big advantage is that as children interact with children of their own age, they tend to develop their language skills at a fast pace with more vocabularies to their credit. We prepare children for the bigger school, instilling self-confidence and independence in them.

At Blossoms correct student-teacher ratio is being followed and here the concepts of play school are very clear. Because, at the end of the day, preschools act as a guiding light which your innocent soul is bound to follow blindly...

Let Your Child Blossom With Smile ... 

Kids Learning Activities at Blossoms

At Blossoms we emphasize on three core skills development of kids:

- **Interpersonal skills development**
- **Intrapersonal skills development**
- **Psychological development**

We at Blossoms take immense care in designing activities for the kids of different age groups. The whole module is segregated into phases starting from some *practical life exercises* which requires body and mind coordination like cloth folding, eating food themselves, block joining, matching the related pictures etc. and step by step progressing to a pattern of formal studies like *Language & Arithmetic*.

Blossoms apart from regular teaching also follows various learning activities to evoke fine and gross motor skills in kids for their overall personality development, some of the activities are listed:

➤ ***Concept Learning***

At Blossoms we follow a certain concept through which the children are taught various activities. A particular concept is chosen and everything related to that concept is taught to kids through games and other activities. For example concept of healthy living, kids are told everything related to be healthy like hygiene, exercising, healthy food etc. This activity help in imparting general knowledge to kids in a fun loving way.

➤ ***Scribbling***

Through scribbling, a kid has its first brush with drawing. At Blossoms have a board wherein a child can come and scribble anything. This educational activity gives his/her a sense of importance even while developing eye-hand coordination.

➤ ***Role Enacting***

Children love to do what adults do. So taking advantage of this fact, at Blossoms we have activities wherein we lay before the kids toys of all the items that are used at home, for example kitchen appliances, gardening kits, doctor kit etc. Through these educational kits, we teach the kids the various concepts behind these items. This learning activity helps the children as they tend to see these items being used at home and their concepts get emphasized even further, thus widening their learning horizons.

- ***Playing with Blocks***
Blocks come an excellent play school educational activity because blocks help children learn various colours, shapes, dimensions even as they begin to understand what towers are or what buildings or cars or roads are. Besides this, blocks help children understand what balancing, shapes, patterns, are all about. We have different kinds of block games wherein kids apply their own logic to come out with some meaningful structure.
- ***Displaying Kid's Activities***
Nothing can encourage a child more than praises, so we display various activities done by the children like- coloring sheets, paper dabbing sheets, patterns made through hand prints, etc. The display of activity make the children feel important and noticed.
- ***Music and Song Activities (Rhymes & moral story telling)***
At Blossoms we teach songs and nursery rhymes along with story telling. These music and song activities are done through CD's and group activities. These activities ignite energy in the children and help them learn things faster.
- ***Art & Craft work***
Craft and art work helps to invoke creativity, imagination and observation in kids. At Blossoms we encourage kids to do different kinds of art and craft activities like paper craft, clay modeling etc. Through these activities we make them learn different kinds of textures. These activities helps to make them innovative and creative.
- ***Logical & Reasoning games***
At Blossoms we have many mind tickling games and exercises like matching the related words & pictures, identification of missing parts etc. These activities which help kids to think logically which is very useful for developing their reasoning skills.
